**Content** Content: This Kindergarten guided reading program includes carefully leveled books (A-D) specifically designed to help students learn and practice the skills appropriate for this stage of reading development. These innovative student books are accompanied by comprehensive lesson plans - one for each title - that include explicit skill activities for phonological and phonemic awareness, phonics, word study, comprehension, and oral reading fluency.

**Student Experiences** Student Experiences: The books have been written to draw in even the reluctant readers using compelling stories and text features. By reading both fiction and nonfiction texts, students build upon their background knowledge, functioning language level, motivation to read the text, ability to read a text fluently, develop vocabulary, and improve their understanding of text features and comprehension strategies. Lesson plan provides blackline master for reinforcement activities.

**Assessment** Assessment: Program Overview introduces the guided reading process and offers suggestions for getting your classroom ready, conducting reading assessments to inform instruction, and placing students into the appropriate guided reading groups. In the "During Reading" section of each lesson plan, various informal assessment tips are provided for teacher observation. Each "After Reading" section of the lesson plan provides for a variety of assessments to show students' understanding of the story. This would include retelling, summarizing, independent reading, identifying details, etc. Rubrics are provided for recording purposes.

**Organization** Organization: The kit provides 16 student titles, a carefully balanced mix of fiction and nonfiction genres and text styles. These titles were written to draw young readers into the text. Step-by step six panel lesson plans - one for each title - help to scaffold instruction tailored to each student's ability level. Before, during and after reading exercises, including a reinforcement activity page, provide explicit skills instruction in the five key components of reading. The Gear Up! Guided Reading Program Overview is a comprehensive booklet that introduces the guided reading process and offers suggestions for getting your classroom ready, conducting reading assessment to inform instruction, and placing students into the appropriate guided reading groups. The Professional Development DVD introduces best practices of guided reading and offers a visual and explicit model of exemplary instructional techniques to support all teachers with small group instruction.
